Source: This table is based on a 9.42 percent sample of the 1,161,928 employees reported at least once by an agricultural employer to California UI authorities in 1987.

3219.45

O O

<sup>(1)</sup> An employee may be counted in more than one Standard Industrial Classification (StO) code.

<sup>(2)</sup> Total farm and non-farm earnings of employees with at least one job in the listed SiC. Farm includes SIC 01, 02, and 071, 072, 0741, 0751, and 076. (3) These farm and nonfarm jobs could have been in more than one county or region. (4) Most of these employees are reported by multi-establishment employers.

Source: This table is based on a 9.42 percent sample of the 1,161,928 employees reported at least once by an agricultural employer to California UI authorities in 1997.

S1925

23,777

10 P

(1) Maximum eamings were determined by comparing total wages from jobs in each Standard Industrial Classification (SIC) & county combination.

For each county, a worker is included only in the SiC & county of their highest wages.

<sup>(2)</sup> Percent totals may not equal 100% because of rounding.

Source: This table is based on a 9.42 percent sample of the 1,161,928 employees reported at least once by an agricultural employer to California UI authorities in 1987.

<sup>(1)</sup> Seasonal emplayees were those reported by one or more farm reporting units to have done 5 to 30 weeks of work and earned \$1000 to \$7500. Jobs from all StOs & FIPs are used to classify a worker.

Farm means Standard Industrial Classification (SKC) 01, 02, and 071, 072, 0741, 0751, and 076. Nonterm includes SIC 0742,0752,078,08-99, and multiestabilishment reporting units which have no SIC. (2) Percent totals may not equal 100% because of rounding. (3) These farm and nonfarm jobs could have been in this or in another county or region; counts only work done outside of this SfC.

Aggregate SICs were ballied by summing individual SICs, causing couble-counting of employees that worked in multiple SICs within an aggregate SIC.

Source: This table is based on a 9.42 percent sample of the 1,161,928 employees reported at least once by an agricultural employer to California UI authorities in 1987.

<sup>(1)</sup> Migrant employees were those reported by at least 2 farm resporting units in at least 2 counties, performed 5 to 30 weeks of farm work, and earned \$1000 to \$7500 from farm reporting units. Jobs from all SiOs & FIPs are used to classify a worker.

<sup>(2)</sup> Percent totals may not equal 100% because of rounding.

<sup>(3)</sup> These farm and nonfarm jobs could have been in this or in another county or region; counts only work done cutside of this SiC.

Farm means Standard Industrial Classification (SIC) 01, 02, and 071, 072, 0741, 0751, and 076. Nonferm includes SIC 0742,0752,078,08-99, and muitiestablishment reporting units which have no SIC. Aggregate SICs were tallied by summing individual SICs, causing double-counting of employees that worked in multiple SICs within an aggregate SICs.

Source: This table is based on a 9.42 percent sample of the 1,161,923 employees reported at least once by an agricultural employer to California UI authorities in 1987.

<sup>(1)</sup> Mixed farm and nontarm employees were reported by at least one farm and one nontarm reporting unit. Jobs from all SIOs & FIPs are used to classify a worker.

<sup>(2)</sup> Percent that may not equal 100% because of rounding.
(3) These farm and nonfarm jobs could have been in this or in another county or region; counts only work done cutside of this SIC.

Farm means Standard Industrial Classification (SIC) 01, 02, and 071, 072, 0741, 0751, and 075;; Monitarm includes SIC 0742,0752,078,08-99, and mutisesablishment reporting units which have no SIC.

## APPENDICES

## Appendix A

## Glossary:

- Agricultural Employees All persons who had at least one job reported by an agricultural employer (with SIC 01, 02, or 07) to Employment Development Department for unemployment insurance purposes. These may include office workers, supervisors, truck drivers, and mechanics, as well as field and livestock workers.
- <u>Agricultural Operations</u> A reporting unit whose SIC code was 01 (Crops), 02 (Livestock), or 07 (Agricultural Services).
- Employer The legal entity which pays the Unemployment Insurance tax to Employment Development Department. In some cases the employer equals one establishment or reporting unit, while in other cases the employer will include several establishments or reporting units.
- Establishment A business unit, such as a store, factory, etc., which produces goods or provides services. It is usually at a single physical location and engaged predominantly in one type of business activity for which a SIC code is assigned on the basis of its primary activity.
- Farm Jobs Jobs classified in SIC codes 01 (Crops), 02 (Livestock), 071 (Soil Preparation Services), 072 (Total Crop Services), 0741 (Livestock Veterinary Services), 0751 (Other Livestock Services), and 076 (Total Farm Labor Contractors and Management Services).
- Maximum Earnings Workers are counted on Table 2 in the industry where they earned their greatest wages. Any additional wages earned in other industries are not counted on this table.
- Migrant Workers A seasonal worker who worked for at least two farm employers in at least two counties, worked 5 to 30 weeks, and earned \$1,000 to \$7,499.
- Mixed Workers Employees who were reported by at least one farm and one nonfarm employer.
- Multi-establishments Large employers having establishments in more than one county or in more than one industrial classification with at least fifty employees in their largest establishment and the sum of fifty or more employees in all other establishments.

- Nonfarm Jobs Jobs classified in SIC codes 0742 (Pet Veterinary Services), 0752 (Other Pet Services), 078 (Total Landscape and Horticultural Services); SIC codes 08-99 (e.g. SIC 15-17 Construction); and multi-establishment reporting units, which have no SIC codes in 1987. In 1988, multi-establishments were classified by their predominant SIC activities and reported under those industries.
- Reporting Unit A business establishment, usually at a single physical location and engaged predominantly in one type of business activity. In certain cases, two or more establishments are combined to make up one reporting unit. This occurs when establishments owned by the same employer are engaged in the same business activity in the same county.
- <u>Seasonal Workers</u> Employees who worked 5 to 30 weeks for one or more farm employers, and earned \$1,000 to \$7,500.
- SIC Standard Industrial Classification is a system of classifying all employers by type of business and industry. Tables in this report show data for all employees who worked in at least one agricultural classification under the SIC coding system. Agricultural SICs are comprised of Agricultural Production Crops (SIC code 01), Agricultural Production Livestock and Animal Specialities (SIC code 02), and Agricultural Services (SIC code 07). These categories at the two-digit SIC level are called Major Groups. Under these Major Groups are Industry Groups at the three-digit level, and Industries at the four-digit level. For example, within the Crops Major Group is the Industry Group of Fruits and Tree Nuts, SIC 017, and within this Industry Group are Industries such as Grapes, SIC 0172, and Deciduous Tree Fruits, SIC 0175.

## Appendix B

## Column Definitions for the Data Tables:

## Table 1 - Agricultural Employees and Earnings by Industry:

**SIC:** The Standard Industrial Classification is a system of classifying all employers by type of business and industry. (See Glossary for additional information.)

Industry Title: The industry name assigned to a given SIC code (e.g. Dairy for SIC 0241).

Employees in This SIC: The total number of employees reported at least once by employers with the given SIC.

Earnings in This SIC (\$ Millions): Earnings of employees who worked in establishments with this SIC.

Total Earnings of Employees With at Least One Job in This SIC (\$ Millions): The total agricultural and non-agricultural earnings of all employees who had at least one job in the given SIC.

Earnings in This SIC as a Percent of Total Earnings: The percentage of earnings in this SIC as a percentage of total agricultural and non-agricultural earnings (for those employees who had at least one job in this SIC).

Employees Who Only Worked in This SIC: The percentage of workers reported in a given SIC who worked only in this SIC and who were not reported to have held any other jobs.

Employees Who Also Had Farm Jobs Outside This SIC: The percentage of employees who worked in this SIC and who also held at least one other farm job in a different SIC.

Employees Who Also Had Nonfarm Jobs Outside This SIC: The percentage of employees who worked in this SIC and who also held at least one other nonfarm job in a different SIC.

## Table 2 - Agricultural Employees Assigned to The Industry of Their Maximum Earnings:

SIC: The Standard Industrial Classification is a system of classifying all employers by type of business and industry. (See Glossary for additional information.)

Industry Title: The industry name assigned to a given SIC code (e.g. Cotton for SIC 0131).

Employees With Maximum Earnings in This SIC: The number of employees whose maximum earnings (greatest amount of earnings in any one industry) were reported within a given SIC.

Earnings in This SIC (\$ Millions): Earnings of employees who worked in establishments with this SIC.

Percent of Total Employees and Earnings in This SIC: The number of workers with maximum earnings in a given SIC, expressed as a percentage of the total number of workers reported in that SIC. Earnings are expressed as a percentage of the total earnings reported in that SIC. There are three category rankings for each:

- 1) Income less than \$1000
- 2) Income of \$1000 \$7499
- 3) Income of \$7500 and above

## Table 3 - Agricultural Employees and Earnings by Industry:

Columns 1-5 of Table 3 uses the same information as Table 1.

Column 6, Farm Earnings Outside This SIC as a Percent of Total Earnings: Farm earnings outside the listed SIC, expressed as a percentage of total farm and nonfarm earnings reported for this SIC.

Column 7, Nonfarm and Multi-establishment Earnings as a Percent of Total Earnings: Nonfarm and multi-establishment earnings outside the listed SIC, expressed as a percentage of total earnings reported for this SIC.

## Appendix C

### **Data Edits**

A 10 percent sample was drawn from all agricultural workers' Social Security Numbers in the calendar year 1987. The data were edited, and nine invalid data sets were produced in addition to the one valid data set. The invalid data sets contained all workers data that:

- (1) were reported by 50 or more employers as an employee during the year,
- (2) had at least one job with non-numeric data in the record (all data should have been numeric),
- (3) had at least one job with at least one quarterly wage report which was greater than the maximum quarter wage or less than zero. The maximum quarter wage was an input parameter quantifying a ceiling amount of earnings that an agricultural worker could make in one quarter if working full-time. Quarterly wage reports are produced for the periods January through March, April through June, July through September, and October through December, of any given year.
- (4) had at least one job with quarterly weeks-of-earnings which were greater than the maximum or less than zero (the maximum value was an input parameter),
- (5) had at least one job with a quarter wage equal to zero and the weeks-of-earnings for that quarter was greater than zero,
- (6) had at least one job with an invalid county code,
- (7) had at least one job with an invalid SIC code,
- (8) had at least one job that has a non-zero combined wage (had wages in another state),
- (9) were reported by the same employer three or more times for the same year.
